ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: ANTIBODIES AGAINST FACTOR VIII WITH MODIFIED GLYCOSYLATION IN THE VARIABLE REGION

(57) Abstract: The present invention discloses inhibitory anti-
bodies against Factor VIII with modified glycosylation, either
by enzymatic deglycosylation or by site directed mutagenesis.
Said antibodies with modified glycosylation have equal affinity
for FVIII but show different inhibiting properties. The use of
one or a mixture of said antibodies allow modulation of the inhi-
bition of factor VIII to levels between 40 and 95%. The present
invention further disclosed pharmaceutical compositions com-
prising inhibitory antibodies against Factor VIII with modified
glycosylation, combinations of these antibodies and methods for
treating haemostasis disorders using said antibodies and anti-
body mixtures.
